SUMMARY

I'm an IT student with hands-on experience in game development, AI systems, and software development overall. I've worked with C#, Java, and Python, building projects that range from 3D Unity games to web apps and AI-based tools.

Through these projects, I've picked up practical experience in gameplay programming, backend logic, database design, and API integration. I like taking ideas from concept to implementation and figuring out how to make them work in a clean and efficient way.

I've also worked in team environments where I contributed to both development and system design. I'm especially interested in building systems that feel smooth, responsive, and actually enjoyable to use.

PROJECTS

Dungeon Puzzle , Puzzle dungeon crawler focused on traps and survival escape.

The Scary Library , Horror game where an AI hunts the player in a haunted library.

Knight With a Gun , Endless survival shooter with wave-based enemy combat.

The Hidden Kanz , Dungeon combat game with AI enemies, sword fighting, and magic.

DocuMind , Arabic document summarizer using local LLMs and text processing.

Restaurant Ordering System , Java system simulating orders using core data structures.

Recipe Hub , Web app for managing and browsing recipes with an admin system.

SecureCheck , Privacy-focused tool for checking data breaches using APIs.

Smart Campus Services , Android app for campus services and local data storage.

Syntax Strike, GP project: 3D educational action game teaching Java through coding puzzles.

EDUCATION

Imam Mohammad Ibn Saud Islamic University (IMSIU) ,
Information Technology - Bachelor's degree
Grade: 4.11

12/2023 – 09/2026
Saudi Arabia, Riyadh

Tuwaiq Academy, Game Design and Development Bootcamp
Completed

09/2025 – 09/2025
Saudi Arabia, Riyadh

Udemy + Gamedev.tv
Complete C# Unity Game Developer 3D (Updated To Unity 6).
Length: 57.5 total hours

2024 – 01/2025
Online

 EXPERIENCE

Enjaz Club Member - Game Development Section, Enjaz IMAMU [↗](#)

10/2024 – 08/2025

Worked with a team on game projects, focusing on gameplay systems and logic. Helped build interactive experiences by writing efficient code and using problem-solving to improve player engagement.

 SKILLS

- **Core:** Problem Solving | Team Problem Solving | Teamwork | Self-Learning | Collaboration | Project Management
- **Game Development:** Game Programming | Game Design | Game Development | Game Mechanics | Game AI | Unity
- **3D & Visual Creation:** Blender | 3D Modeling | 3D Rendering
- **Programming & Web Development:** C# | Python | Flask | Java | JavaScript | HTML | CSS | PHP | XAMPP | phpMyAdmin | SQLite | MySQL
- **Artificial Intelligence:** Artificial Intelligence (AI) | Generative AI | Large Language Models (LLMs) | Vibe Coding
- **Technical & Conceptual:** Software Development | Web Development | Web Design | Software Architecture | Human-Computer Interaction | Programming Languages | MVC

 CERTIFICATES

- Complete C# Unity Game Developer 3D (Updated To Unity 6) [↗](#)
- Game Design and Development [↗](#)
- 3D Game Developer Bootcamp [↗](#)
- Introduction to Blender [↗](#)
- Unity Essentials Unity [↗](#)
- Jobs in game development [↗](#)
- Game design and development with Unity and generative AI tools [↗](#)
- Game design: between imagination and reality [↗](#)

 ACHIEVEMENTS

- 1st Place Winner - PwC Middle East Hackathon** [↗](#), PwC Middle East

07/02/2026
- 1st Place Winner - Enjaz Game Jam**, Enjaz Club

19/11/2024
