Turki Alshalaan

IT Student at IMSIU | Game Developer/Programmer

trookishgamedev@gmail.com (996) 053-184-9801 Saudi Arabia, Riyadh

My Portfolio LinkedIn trookish

SUMMARY

IT student and passionate Game Developer with over 1 year of hands-on experience in Unity and C#. Specialized in building **3D gameplay systems, AI behaviors, and puzzle mechanics**.

Experienced in developing complete game experiences from concept to prototype, including **gameplay programming, level design, and 3D asset creation using Blender**.

Strong collaborator with a focus on **game feel, immersion, and player experience**, with proven ability to contribute effectively in team-based development environments.

EXPERIENCE

10/2024 – 08/2025

Enjaz Club Member (IMAMU) - Game Development section,
Enjaz IMAMU

- Worked closely with a team of developers on various game projects with a focus on enhancing gameplay logic.
- Played a key role in developing interactive experiences, utilizing efficient coding techniques and creative problem-solving skills to engage users.

EDUCATION

12/2023 – Present

Information Technology - Bachelor's degree,
Imam Muhammad ibn Saud Islamic University

PROJECTS

Dungeon Puzzle ↗, *Unity, C#, Puzzle, 3D*

- A puzzle-based dungeon crawler where players navigate through dangerous environments.
- death traps and environmental challenges to create a survival-focused escape experience.
- Developed the core programming mechanics and game logic to manage trap triggers and player progression.

The Scary Library ↗, *Unity, C#, Horror, AI, Game Jam*

- A horror game developed during a Game Jam featuring an AI enemy that hunts the player.
- book-based puzzles and a haunted library setting to create an immersive escape experience.
- Developed the core programming mechanics and game logic, including the AI enemy behavior and puzzle systems.

Knight With a Gun ↗, *Unity,C#,Action,Survival,Endless*

- An action-packed survival game where players face hordes of enemies as a gun-wielding Knight.
- endless horde mechanics and combat systems to create a high-intensity survival experience.
- Developed the core programming mechanics and game logic for player combat and enemy wave management.

The Hidden Kanz ↗, *Unity, C#, Combat, AI, 3D*

- A combat-based dungeon crawler where players fight waves of skeleton AI enemies.
- Utilizes sword combat and magic abilities to survive and clear the dungeon.
- Developed the core programming mechanics and game logic for combat systems and enemy AI behavior.

DocuMind ↗, *Python,LLM,Streamlit,Arabic,NLP,Open Source*

- An open-source summarization system that processes Arabic PDF documents using local LLMs.
- Utilizes text extraction and clustering techniques to generate concise summaries through a Streamlit interface.
- Collaborated with a partner to develop the core programming logic and document processing pipeline.

Restaurant Ordering System, *Java,Data Structures,Tree,Queue,Stack*

- A Java-based restaurant ordering application featuring a tree-structured menu and order queue management.
- Utilizes a stack-based inventory system to manage a simulated drink vending machine.
- Collaborated with a team to develop the core programming logic and data structure implementation for the menu and inventory systems.

Recipe Hub, *PHP,MySQL,HTML,CSS,JavaScript*

- A web-based recipe management application built with PHP, MySQL, and JavaScript.
- Utilizes search functionality, categories, and an admin panel to browse and manage recipes.

- Developed the core programming logic and system architecture across two separate development teams.

SecureCheck, *Python,Flask,HTML/CSS,API Integration,Cybersecurity*

- A web-based data breach awareness platform that helps users check for compromised passwords and email addresses.
- Defined the k-Anonymity model and privacy-preserving techniques to ensure ethical security tool development.
- Developed the core programming logic and security architecture to manage data breach verification and user privacy.

Smart Campus Services, *Java,Android,SQLite,MVC*

- A comprehensive Android application designed to provide campus services and product browsing to students.
- Utilizes Java and SQLite to manage announcements, shopping cart functionality, and local data storage.
- Developed the core programming logic and database architecture to facilitate seamless campus service integration.

SKILLS

Problem-solving | Team Problem Solving | Teamwork | Self Learning

Collaboration | Project Management | Game Programming | Game Design

Game Development | Game Mechanics | Game AI | Unity | Blender

3D Modeling | 3D Rendering | C# | Python | Flask | Java | Java Script

HTML | CSS | PHP | XAMPP | phpMyAdmin | SQLite | MySQL

Artificial Intelligence (AI) | Generative AI | Large Language Models (LLM)

Vibe Coding | Software Development | Web Development | Web Design

Architecture | Human Computer Interaction | Programming Languages

MVC (Model-View-Controller)

CERTIFICATES

Complete C# Unity Game Developer 3D (Updated To Unity 6). 기 Udemy — Udemy / GameDev.tv

Game Design and Development — Tuwaiq Academy

3D Game Developer Bootcamp — Imam Muhammad ibn Saud Islamic University

Introduction to Blender — Imam Muhammad ibn Saud Islamic University

Unity Essentials Unity — Unity

Jobs in game development — Digital Attaa Initiative

Game design and development with Unity and generative Al tools — Digital Attaa Initiative

Game design: between imagination and reality — Digital Attaa Initiative

AWARDS

07/02/2026

1st Place Winner - PwC Middle East Hackathon, *PwC Middle East*

Project: TourLens

An AR glasses solution that serves as a hands-free indoor tour guide, overlaying real-time visualizations to enhance visitor experiences at events and cultural sites in Riyadh.

19/11/2024

1st Place Winner - Enjaz Game Jam,

Enjaz Club - Game Dev Section (IMAMU)

Game: The Scary Library

A horror game where players solve book puzzles to escape a haunted library while being hunted by an AI enemy.
